

Re-Elect Corneliu Chisu, P.Eng.

PEO Vice-President

Experienced

Corneliu has worked in PEO, PEO Council Committees, Chapter and Task Forces. He served as a Lieutenant Governor member in the College of Medical Radiation Technologists of Ontario and the Building Materials Evaluation Commission.

Committed

Corneliu has been a P.Eng. since 1989. His many contributions to Canadian engineers and society have been formally recognized.

Dedicated

The emergence of new engineering fields has caused a Revolution in Engineering Affairs. Corneliu is for fundamental change in the approach of leading the profession in the 21st century. He is for a better recognition of the PEO licence by demonstrating its value to society.

He Gets Things Done!

Corneliu Chisu, P.Eng.

Project Manager
GENIVAR, Toronto

Awards

PEO Order of Honour
Canadian Forces Decoration (CD)
Commemorative Medal for the Golden Jubilee of Her Majesty Queen Elizabeth II
NATO Medal for Bosnia and Herzegovina
Canadian Peacekeeping Medal
General Campaign Star Afghanistan

Education

B. Eng., M. Eng., Engineering Physics, 1988

Professional registrations

PEO, PMI, ATIO, OACETT, CofA

PEO/Chapter Volunteer Services

Vice President (elected 2009)
Councillor East Central Region (2007/09)
Registration/Discipline/ Committees
Audit/ Executive/Committees
Scarborough Chapter, Executive since 1989

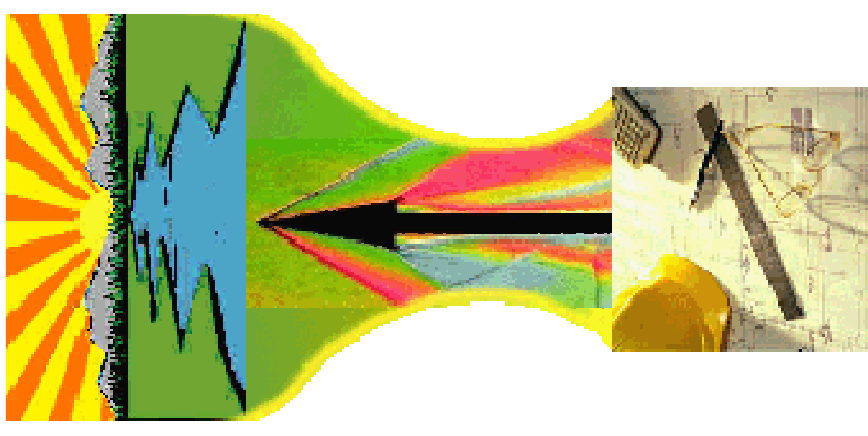

Boards/Committees/Community Service

Building Materials Evaluation Commission
Task Force on Access to Professions and Trades
Aboriginal and Overseas Advisers to Business

The NEW P.Eng.

your guide to the

Evolution in Engineering Affairs

start exploring now

Relevance

The public demands our engineering expertise on issues such as Walkerton, electrical black-outs and environmental disasters. PEO needs to address this by providing discipline specialties and the respective quality assurance for professional practice.

Premier Dalton McGuinty and Corneliu Chisu

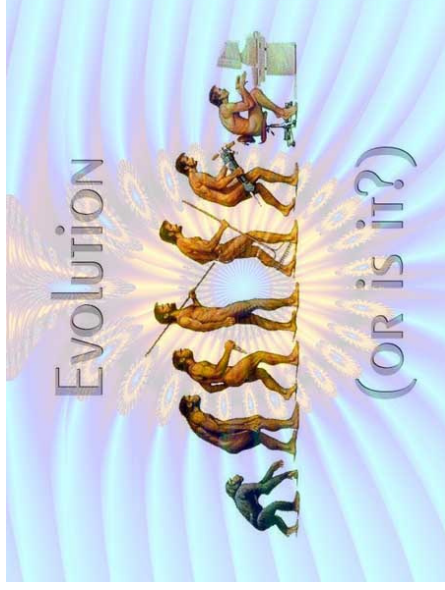

The current industrial and supervisory exemptions confuse the public. PEO needs to address this issue as well as assuring that the engineering profession is relevant to the public, Canadian engineering graduates and foreign trained engineers.

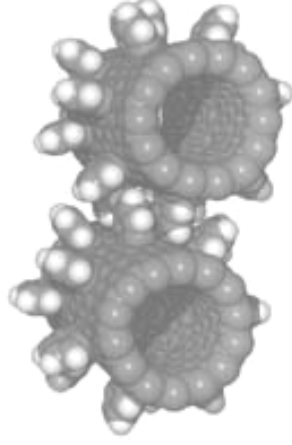

Minister James M. Flaherty and Corneliu Chisu

Evolution

PEO must realize that the world is evolving around us, that our Professional Engineers Act is outdated. A fundamental review must be done now because society is our judge.

Safe drinking water, reliable energy sources and protection of the environment are major public issues. PEO must be proactive in engineering matters to fulfill the expectations of our society.

Molecular gears

Governance

In our self-governing profession, we need to have our members more involved.

PEO must establish, through a well thought-out governance model, a mechanism that will allow members to participate in the self-governing of our profession. This will assure a healthy balance between protecting the public interest and the profession itself.

PEO should be fully accountable to members on the spending of members' equity and should conduct their affairs within balanced budgets.

PEO must listen to members and chapters in determining policy especially related to fee increases and unbridled spending outside the regulatory scope of the profession.
